

Product Profile

Product

TDR 100

Overview

The **TDR100** is an ergonomically designed, rugged tread depth reader that provides an essential Bluetooth companion tool to the **Tech450** and **Tech600** range complementing the Bartec **"Test Before Touch"** ethos, by giving a comprehensive overview to both technician and customer.

The **TDR100** tool works in two convenient ways - the **Tread Rite App** or direct communication to TPMS tool.

Simple integration with your Bartec Tool gives a flexible number of measurement points and clear data on both the Tool and in your inspection report available through TPMS desktop.

Kit contains: Tool, 2x AAA batteries.
